Subject: Addendum to 8EHQ-99-14541 TSCA 8(e) submission on August 23, 1999.

BASF Corporation is submitting additional results of the acute toxicity test with Octylamine (CASRN: 111-86-4) in Algae (*Scenedesmus subspicatus*) conducted by BASF Aktiengesellschaft, Ludwigshafen, Germany.

A 72-hour biomass ( $E_bC_{50}$ ) effect concentration of 0.12 mg/l was submitted on August 23, 1999.

The following additional effect concentration (mg/L) was obtained based on nominal concentrations:

$$E_rC_{50} = 0.23 \text{ mg/l}$$

Although the findings are not considered to present a substantial risk to human health or the environment, BASF Corporation understands that reporting results from this study under TSCA 8(e) is in accordance with EPA's policy.

Sincerely,

*Sree Jasti*
